DVDShrink is finally beaten

July 22, 2008: DVD neXt COPY announces the release of version V2.9.9.1, a new and improved version that has the best quality of any DVD Copy software available. DVD neXt COPY triggers the Quality King and jumps over the magical quality hurdle of the legendary DVDShrink.

Until now the "old" DVDShrink possessed the best quality of any DVD copy program available. It was impossible for any competitors to reach this level of high quality and speed. As of now, DVD neXt COPY has broken through this barrier, and provides better quality and much faster burns than DVDShrink (High Quality Mode).

DVD neXt COPY now provides the highest quality of any DVD copy software available. Our extensive quality check was performed on the majority of the latest DVD movies with excellent results. We have compiled test report on two special movies that are often used as quality reference movies, because they are very complicated to recompress. You can see our results in this test report:
